

Professional Experience

Jack is an accomplished Physiotherapist with almost a decade of experience. He specialises in the assessment and rehabilitation of patients with upper and lower limb loss, in addition to having experience across a broad range of other specialities. He is currently the Lead Clinician at one of the UK's largest regional limb centres and sits as the Yorkshire/North East Regional Representative on the British Association of Chartered Physiotherapists in Limb Absence Rehabilitation (BACPAR) committee. Jack brings a specialist knowledge of prosthetics and is highly proficient in functional health assessment, exercise rehabilitation, clinical risk management, physical health promotion and pain management. Jack has extensive clinical leadership and management responsibility, including supervising, training and developing teams, supporting audit activities and leading service development.

As an Expert Witness, Jack utilises his wealth of clinical expertise to produce holistic, evidence-based and impartial reports. He is fully trained in Civil Procedure Rules, including relevant revisions as they arise, and diligently maintains his continuing professional development through a range of training activities.
