

Case Management Experience

Ameya Phatak, an advanced neuro physiotherapist with over 20 years of experience, brings a comprehensive biopsychosocial approach to his case management work. His expertise in conducting thorough assessments addresses the holistic needs of clients, significantly enhancing their overall quality of life. In his professional career, Ameya specialised in acute rehabilitation, stroke rehabilitation, and management of long-term conditions. He has developed a deep understanding of the complexities involved in acquired brain injury, regional musculoskeletal disorders, persistent pain, and complex mental health problems.

In his case management role, Ameya is highly motivated and 'people-focused,' employing advanced analytical and decision-making skills. He is adept at working both as part of a team and independently, consistently providing exceptional service to his clients. His exceptional organizational, multi-tasking, and prioritisation skills enable him to manage complex cases effectively. Ameya is passionate about continually developing new skills and maintaining a consistent record of over-achievement in his field. His approach is client-centered, ensuring that each individual's rehabilitation and recovery journey is tailored to their specific needs, thereby maximising their recovery potential and enhancing their quality of life.

Professional Background

Ameya Phatak's professional background extends beyond his specialisation in brain injury and acquired brain injury, encompassing a wide scope of physiotherapy practice. He qualified as a physiotherapist in 2002 and completed his Master's degree in 2004, laying a strong foundation for his diverse career. Ameya's expertise includes managing a range of neurological, spinal, orthopaedic, and musculoskeletal conditions. His work in persistent pain management, particularly with patients suffering from conditions like Complex Regional Pain Syndrome, phantom limb pain, fibromyalgia, and chronic pain syndrome, showcases his broad skill set in physiotherapy.

In addition to his clinical work, Ameya has played a significant role in organizational guideline implementation and service provision changes. He has been instrumental in developing individualized training and support programs for midwives and other healthcare professionals. His leadership experience as a CQC registered manager and Head of Quality and Governance for a national musculoskeletal service provider further demonstrates his capabilities in healthcare management and governance. Ameya's commitment to evidence-based practice and continuous professional development is evident in his pursuit of postgraduate training and his role as an educator in obstetric emergencies and life support.
